PETER PEPPER PRODUCTS
EXPRESSIVE ESSENTIALS®

Exilis Shelving combines an elegant, sleek and minimalist design that provides a place for objects both large and small. To maintain its graceful floating illusion, Exilis combines both strength and substantial weight bearing capacity using discreetly concealed brackets. Available as individually mounted shelves in various lengths.

Freestanding, Counter height or Full height displays with double sided shelving can be arranged with either Exilis Flat or Exilis Slope shelves. The cast aluminum base provides a stable platform for a variety of display presentations or space divisions.

Exilis Wall-Mounted System allows maximum flexibility with adjustable elevations and lengths. The Exilis Flat and Slope shelves are supported by vertical wall rails with infinite height adjustments.

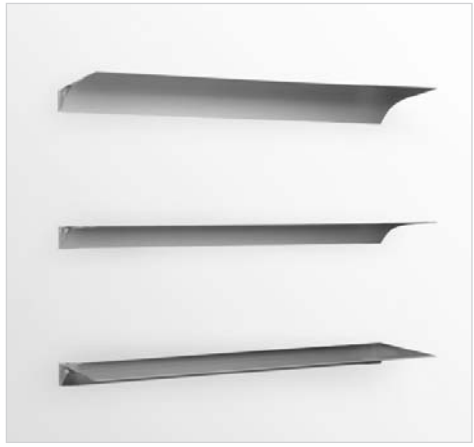

Exilis is available in two extruded aluminum profiles; flat or sloping for displaying literature, art and presentation materials. Beautifully finished in natural anodized aluminum or white.

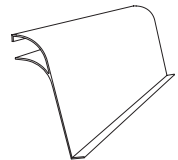

Design:
Patrik Lindberg + Hampus Östberg

REMiX

INTRODUCING
A NEW COLLECTION
OF RECEPTACLES

REMiX receptacles are designed for multi-stream recycling and waste management in conference and training rooms, offices, kitchens, or break rooms. Available in two sizes with a variety of lid configurations, REMiX can be mixed and matched to accommodate any volume and type of waste. Its elegant and unassuming design makes REMiX suitable for all corporate interiors, and its slim profile is ideal for placement in narrow hallways or high-traffic areas.

The sturdy steel frame is clad in an exterior grade aluminum composite material which is highly resistant to denting yet easy to clean. Finishes include Silver, Stainless, Bronze, Dark Bronze and White, and supplied with matching labels identifying waste streams. For easy trash removal, both bin sizes feature a locking door which conveniently eliminates the need to lift heavy bags or liners. Unique to REMiX are semi-rigid liners made of 100% reclaimed material from advertising billboards. REMiX lids are fabricated from formaldehyde-free MDF with a powder-coated finish or optional solid surface materials.

HexBin waste and recycling receptacles offer a versatile modular solution for single or sorted collection. The HexBin shape allows for individual or multiple groupings suitable for recycling paper, cans, glass, plastic and waste. Open top receptacles include three options; paper slot, trash and recycling or a covered rain top with side opening for interior and exterior applications.

Three sizes with capacities of 12, 22 and 37 gallons are available in Stainless Steel and powder coated Aluminum Metallic finishes. Roto-molded one-piece polyethylene tops in Graphite finish have a molded in 'waste' or 'recycling' icon decal. A polyethylene liner and adjustable foot glides are included. The HexBin is 100% recyclable.

HEXBINS

A NEW COLLECTION
OF RECEPTACLES
